

Goes Tall
extends to 1.7m

Goes Low
3 or 4 leg angles

Levelling System
control in handle

Removable
levelling system

ALTA PRO 3VRL

Tall, incredibly solid CNC machined tripod series with an intuitive levelling system that is removable to become a quick release system for tripod heads

The levelling system can be easily removed and switched with the lightweight platform included in the pack.

This allows you to switch tripod heads for different styles in seconds without needing to remove and replace the head.

Using the lightweight platform also lowers the weight by over 300g. Great if you're using it for landscapes and needing to carry it longer distances!

TRIPOD HEAD QUICK RELEASE SYSTEM

1

1

Loosen the levelling system adjustment knob

2

2

Flip the pan/safety lock knob up to release and remove the levelling system.

TIP

Using a **dual axis ball head** (such as the VEO BH-250S) on the lightweight platform will help you get a level seconds using the ball joint and allow you to pan/reframe your shot using the top axis

TIP | Perfect for spotting scopes

- 1** Retractable spiked feet
- 2** Easy set & easy clean leg locks
- 3** 30mm legs that deliver a solid 25kg load capacity
- 4** Levelling system control handle ($\pm 15^\circ$ tilt | 360° pan)
- 5** Easy set leg angles (23° , 50° & 80°)
- 6** Platform loosening lock
- 7** Platform safety lock release
- 8** Lightweight platform
- 9** Levelling platform with 75mm diameter base and $3/8"$ thread

Feature	Alta Pro 3VRL 303AT	Alta Pro 3VRL 303CT	Alta Pro 3VRL 304AT	Alta Pro 3VRL 304CT
Material	Aluminium	Carbon Fibre	Aluminium	Carbon Fibre
Load Capacity	25kg			
Removable Levelling System	Yes Tilts ±15° Rotates 360° 75mm diameter with 3/8" thread Weighs 420g
