rubber/spiked feet

# ALTA PRO

The original multi-angle central column which moves almost 360° in any direction, creating the perfect angle for your shoot

# DESIGNED FOR LONG LENSES

## IDEAL FOR

The multi-angle central column allows you to position the camera down low and in the best position to frame your shot. This makes it ideal for styles like:

As well as more traditional styles, such as landscape photography

## Why choose "Arca compatible"?

Arca compatible relates to the clamp system on the top of a tripod head and is rapidly becoming an unofficial industry standard. This allows you to use specialist plates from other brands, and makes it easier to replace plates over time.
