

Second Top Axis
to level your camera fast

Oversized Ball
for maximum grip

Friction Control
for maximum control

Traditional Pan Axis
for traditional panoramas

LB-S

LIGHTWEIGHT DUAL AXIS BALL HEADS

Maximum performance in a range of lightweight, extra compact Arca compatible ball heads for any tripod, from travel to full sized

What is the benefit of a "Dual Axis Ball Head"

The main benefit of the second pan-axis is that it allows you to **level your camera in seconds on any terrain** using the ball lock, and then reframe your shot or create perfect panoramas using the second pan-axis.

LP-S LIGHTWEIGHT DUAL AXIS BALL HEADS

- 1 **Traditional pan-axis** at the base of the tripod head
- 2 **Traditional pan-axis lock**
- 3 **Ball locking knob**
- 4 **Friction control**
- 5 **Second pan-axis** under quick release lamp.
- 6 **Second pan-axis lock**
- 7 **Quick release plate clamp**
- 8 Arca compatible **QS-45H quick release plate**

TIP

To chose the right sized head for your tripod, simply measure across the top of the centre column and choose the best fit "Base Diameter" below

Model:	LP-40S	LBP-45S	LBP-50S	LBP-55S
For	Travel Tripod	Travel Tripod	Mid/Full Size Tripod	Full Size Tripod
Ball Diameter	25mm	30mm	35mm	40mm
