Arca compatible
fits many scope feet

SPOTTING SCOPE TRIPODS

Tripod kits designed for birders to get the best out of any spotting scope

Each tripod includes a two-way pan head to deliver smooth, controlled tracking, allowing the birder to release, follow and then lock down again when the bird settles, with a hand free to adjust the zoom and focus.

VESTA GO TRAVEL TRIPODS

Tripods that are designed to balance portability for travellers and birders needing to cover longer distances on foot, with the stability and control needed in the field.

MORE INFO

Arca compatible PH-24 2-way pan head with tilt control in the handle and a separate pan lock, making it suitable for birders and content creators.

Designed to be compact and lightweight for birders who travel or cover longer distances.

Includes a smartphone adaptor to fit a smartphone from 54mm to 87mm wide

BIRDING TRIPOD HEADS

If you already have a tripod, you can convert it to a birding tripod with one of the Vanguard heads designed for a spotting scope, and that will fit onto any tripod.

MORE INFO

Many spotting scopes come with an Arca compatible foot that can attach directly into the clamp for the most secure fit

Quick release plate includes a non-twist spring pin to keep the spotting scope secure and facing forward.

Why not use a **VEO PA-65** digiscope kit with your smartphone to capture your sightings?

Choosing the right head:

1

Measure the top of the support you are attaching the head too in mm

2

Choose the head with the nearest matching base
